Manufacturing Quality & Compliance Support

Manufacturing  
Quality Consulting &  
Compliance Support

UEI D9S3DGMWFB26

CAGE CODE 13F98

## NAICS CODES

Quality Consulting	541611, 541614
Documentation Services	561410, 541430
Inspection Services	541380
Technical Consulting	541690

## CORE SERVICE AREAS

- Manufacturing Quality Consulting
- Quality Systems Support
- Independent Source Inspection
- AS9102 First Article Inspection Support
- Internal Audit & Compliance Support
- Technical Documentation Services
- Controlled Document Development
- Technical Visual Communication

## PAST PERFORMANCE

- Supported manufacturing quality operations in AS9100-regulated environments since 2017
- Multidisciplinary expertise in QA/QC, document control, inspection, and visual communication
- Document control management including:
  - Revision-controlled engineering drawing and project-related documentation
- AS9100D internal auditor experience supporting compliance alignment

## KEY DIFFERENTIATORS

- Independent verification of products and manufacturing processes at supplier facilities prior to shipment.
- Practical manufacturing quality support.
- AS9102 First Article Inspection support for verification, documentation review, and compliance validation.
- Agile, low overhead operation supporting rapid tasking and overflow inspection requirements.
- Scalable quality support for small and mid sized manufacturers and suppliers.
- Experience as a quality professional supporting structured, accuracy-focused documentation and operational standards
- Familiarity with AS9100-controlled documentation environments
- Revision-controlled documentation practices and experience
- Aerospace and manufacturing operational support
- Objective, evidence based quality oversight focused on reducing risk and improving conformity.

**R.L. Roberts II Design** specializes in manufacturing quality consulting, independent source inspection, AS9102 First Article Inspection support, technical documentation, and quality systems support for aerospace, defense, government contractors, and precision manufacturers. We provide practical, objective solutions focused on compliance, verification, traceability, and operational consistency to help organizations meet customer and regulatory requirements.

We support manufacturers and government contractors through quality consulting, supplier oversight, inspection support, controlled documentation, and technical communication. Every engagement is approached with attention to documentation accuracy, reporting consistency, objective evidence, and practical application, helping organizations strengthen quality processes, improve audit readiness, and maintain confidence.
